

## **Product Data Sheet**

## hsa-miR-519d-3p miRNA Inhibitor

| Catalog #      | Source    | Reactivity               | Applications  |
|----------------|-----------|--------------------------|---|
| CIH0284        | Synthetic | н                        |   |
| Description    | Syr       | thetic miRNA inhibito    | rs are used to inhibit hsa-miR-519d-3p by transfaction.   |
| Specificity    | mi        | RNA Inhibitors are che   | mically synthesized, complementary, antisense             |
|                | sin       | gle-stranded oligonuc    | eotides to their target, endogenous mature miRNA. It      |
|                | eff       | ectively prevents the t  | arget miRNA to bind to normal cellular binding sites.     |
|                | Tra       | nsfection of inhibitors  | followed by downstream gene expression analysis or        |
|                | ph        | enotypic analysis, is pe | erformed to elucidate the targets and roles of particular |
|                | mil       | RNAs.                    |   |
| Form           | Lyc       | philized powder          |   |
| Gene Symbol    | hsa       | a-miR-519d-3p            |   |
| Accession No.  | MI        | MAT0002853               |   |
| Components     | Thi       | s synthetic miRNA is b   | ased on the mature miRNA sequence. It does not contain    |
|                | the       | e full precursor miRNA   | stem-loop.  |
| Directions for | Use We    | recommend re-suspe       | nding the lyophilized synthetic miRNA using DNase and     |
|                | RN        | ase-free ddH2O. To m     | ake a 100 uM stock, dissolve the lyophilized powder using |
|                | 100       | ) ul of ddH2O.           |   |
| Storage/Stabi  | lity Shi  | pped at 4 °C. Store at   | -20 °C for one year. Avoid freeze-thaw cycles after       |
|                | rec       | onstitution.             |   |

Application key: E- ELISA, WB- Western blot, IH- Immunohistochemistry, IF- Immunofluorescence, FC- Flow cytometry, IC-Immunocytochemistry, IP- Immunoprecipitation, ChIP- Chromatin Immunoprecipitation, EMSA- Electrophoretic Mobility Shift Assay, BL- Blocking, SE- Sandwich ELISA, CBE- Cell-based ELISA, RNAi- RNA interference Species reactivity key: H- Human, M- Mouse, R- Rat, B- Bovine, C- Chicken, D- Dog, G- Goat, Mk- Monkey, P- Pig, Rb-Rabbit, S- Sheep, Z- Zebrafish
