| Description    | Synthe      | etic miRNA mimics a  | e used to overexpress mmu-miR-574-5p by transfaction.    |  |  |  |
| Specificity    | miRNA       | miRNA Mimics are chemically modified, double-stranded miRNA-like RNA which are |  |  |  |  |
|                | design      | ned to copy the funct  | ionality of mature endogenous miRNA upon transfection.   |  |  |  |
|                | At the      | 5'-end, it is synthesi   | zed with a partially complementary motif to 3'UTR end of |  |  |  |
|                | the ta      | rget gene, which allo  | ws the miRNA mimic to specifically bind to the target.   |  |  |  |
