

## **Product Data Sheet**

## mmu-miR-3068-5p miRNA Mimic

| Catalog #             | Source                                       | Reactivity              | Applications                                              |  |  |  |
|-----------------------|----------------------------------------------|-------------------------|-----------------------------------------------------------|--|--|--|
| CMM0709               | Synthetic                                    | Μ                       |                                                           |  |  |  |
| Description           | Synth                                        | etic miRNA mimics a     | re used to overexpress mmu-miR-3068-5p by transfaction.   |  |  |  |
| Specificity           | miRN                                         | A Mimics are chemic     | ally modified, double-stranded miRNA-like RNA which are   |  |  |  |
|                       | desigr                                       | ned to copy the func    | tionality of mature endogenous miRNA upon transfection.   |  |  |  |
|                       | At the                                       | e 5'-end, it is synthes | ized with a partially complementary motif to 3'UTR end of |  |  |  |
|                       | the ta                                       | rget gene, which all    | ows the miRNA mimic to specifically bind to the target.   |  |  |  |
|                       | Transfection of mimics followed by downstrea |                         | owed by downstream gene expression analysis or            |  |  |  |
|                       | pheno                                        | otypic analysis, is pe  | formed to elucidate the targets and roles of particular   |  |  |  |
|                       | miRN                                         | As.                     |                                                           |  |  |  |
| Form                  | Lyoph                                        | ilized powder           |                                                           |  |  |  |
| Gene Symbol           | mmu-                                         | mmu-miR-3068-5p         |                                                           |  |  |  |
| Accession No.         | . MIMA                                       | T0014842                |                                                           |  |  |  |
| Components            | This sy                                      | ynthetic miRNA is ba    | sed on the mature miRNA sequence. It does not contain     |  |  |  |
|                       | the fu                                       | Il precursor miRNA      | stem-loop.                                                |  |  |  |
| <b>Directions for</b> | Use We re                                    | commend re-susper       | nding the lyophilized synthetic miRNA using DNase and     |  |  |  |
|                       | RNase                                        | e-free ddH2O. To ma     | ke a 100 uM stock, dissolve the lyophilized powder using  |  |  |  |
|                       | 50 ul o                                      | of ddH2O.               |                                                           |  |  |  |
| Storage/Stabi         | lity Shipp                                   | ed at 4 °C. Store at -  | 20 °C for one year. Avoid freeze-thaw cycles after        |  |  |  |
|                       | recon                                        | stitution.              |                                                           |  |  |  |

Application key: E- ELISA, WB- Western blot, IH- Immunohistochemistry, IF- Immunofluorescence, FC- Flow cytometry, IC-Immunocytochemistry, IP- Immunoprecipitation, ChIP- Chromatin Immunoprecipitation, EMSA- Electrophoretic Mobility Shift Assay, BL- Blocking, SE- Sandwich ELISA, CBE- Cell-based ELISA, RNAi- RNA interference Species reactivity key: H- Human, M- Mouse, R- Rat, B- Bovine, C- Chicken, D- Dog, G- Goat, Mk- Monkey, P- Pig, Rb-Rabbit, S- Sheep, Z- Zebrafish
